

## Student guide on taking Offline(Choice) Modeled courses (Fall 2021)

### What is Offline(Choice) Modeled course?

- Professors give lectures in the assigned classroom, while online classes are provided (simultaneous live streaming of the on-site lectures or post-class upload of recorded video/audio file, etc.).
- Students choose their choice of class model either to attend (and participate) online or offline. Please refer to the following page for further details.
- Your choice of either taking the class online or offline will not affect your attendance or grade.

### Is my class a “ Offline(Choice)?” How can I tell?

Go to “Course Schedule/Syllabus” menu to find out whether your course is a Offline(Choice) model or not. Please refer to the following example:

## Keep in Mind:

- Be sure to **save your data before each deadline**. You can make changes during the 2<sup>nd</sup> round on the data you created in the 1<sup>st</sup> round. No changes are allowed after the 2<sup>nd</sup> (Final) round.
- The number of students who can choose to participate in on-site lecture is limited on a first come first served basis. It is due to the limited number of classroom capacities as well as to maintain everyone's safety and disinfection.
- In case no one chooses to participate in on-site lecture, your Offline(Choice) modeled course will automatically be changed to an Online Only modeled course.
