Ewha’s Path, over 130 Years of Making History and Pioneering

A stranger to limits, Ewha’s challenges have become a history of firsts and a source of its identity and pride. As a pioneer of higher education for women in Korea, Ewha has and continues to strive tirelessly upon the unbeaten path.

Ewha’s Record of Firsts

First of Ewha

• Modern education for women (1886)
• Women’s hospital (1887)
• Higher education courses for women (1910)
• University accreditation (1946)
• Graduate school for women (1950)
• International summer college (1910)
• Department of Math (1925), Pharmacy, Fine Arts, Physical Education (1945), Drama (1965), Women’s Studies, Korean Studies (1962)
• World’s first women’s college of engineering (1996)
• Division of International Studies (2001)
• Scranton Honors Program (open-major program) (2007)
• Brain and Cognitive Sciences Major in an undergraduate program (2015)

1886~

Ewha Haktang

1886: American Methodist missionary Mary F. Scranton began classes with a single student
1887: King Gojong bestowed the name Ewha Haktang
1894: Ewha Haktang Middle School opened

1910~

College Courses at Ewha

1910: College courses launched
1914: First graduation ceremony of Ewha College Courses

1925~

Ewha College

1925: Ewha Women’s University
1935: Campus relocated to Seocho

1945~

Ewha Women’s University

1946: Ewha accredited as the first university in Korea
1949: First graduation ceremony of Ewha Women’s University
1950: First women’s graduate school opened
1951: War-time evacuee campus opened in Busan

1961~

Ewha’s Growth

1963: First doctoral degree awarded
1971: International summer college launched
1977: Women’s studies courses offered as the first in Asia

1979~

Ewha’s Leap Forward

1979: Ewha’s 120th anniversary
1995: Ewha ranked first place in comprehensive university accreditation

2001~

Global Hub for Women’s Education

2001: Division of International Studies launched
2004: Ewha ranked top place in comprehensive university accreditation
2005: EGP launched to foster female leaders in developing countries
2007: Ewha ICOSA Master’s Program launched for female public officials in developing countries
2008: Ewha constructed as Korea’s largest eco-friendly underground campus
2011: University-Industry collaborative apartment signed with Sinosy
2012: EGP launched to train female leaders in NDP sector
2014: Global R&D Center University-Industry Cooperation Building opened
2016: Eco-Friendly future-oriented dormitory E-House constructed

2017~

Women Intellectuals Pioneering the Future

2017: Ranked top place in the Leiden Ranking for two consecutive years
Another leap in engineering education: ELTEC College of Engineering established
2018: Patient-centered Global Smart Ewha Woman’s University Social Hospital constructed
2019: Research Cooperation Building constructed to lead global scientific research

History of Ewha’s Record of Firsts

- Modern education for women (1886)
- Women’s hospital (1887)
- Higher education courses for women (1910)
- University accreditation (1946)
- Graduate school for women (1950)
- International summer college (1910)
- Department of Math (1925), Pharmacy, Fine Arts, Physical Education (1945), Drama (1965), Women’s Studies, Korean Studies (1962)
- World’s first women’s college of engineering (1996)
- Division of International Studies (2001)
- Scranton Honors Program (open-major program) (2007)
- Brain and Cognitive Sciences Major in an undergraduate program (2015)
Ewha, More Radiant Today Than Yesterday

Producing Female Leaders to Lead the World

From a single student in 1886, Ewha grew into an extensive community of 250,000 women. In 1910, Ewha established four-year College Courses, and in 1914 produced its first three female graduates, laying a foundation to nurture female professionals and leaders. The outstanding talents that Ewha has produced over the past 130 years now seek to direct our times towards a better world.

An Optimal Campus Environment for Learning

In 1886, Ewha Haktang started the first women's education program in Korea in a traditional Korean schoolhouse of only 660㎡. As the number of students gradually increased, Ewha demolished the original building in 1887 and started building a new, western-style two-floor building with classrooms, dorms, a cafeteria, and electricity, which was completed in 1900. Over 100 years later, Ewha completed the Ewha Campus Complex (ECC) in 2008. The ECC, recognized for shifting the paradigm of university campuses worldwide, houses various cultural and convenience facilities as well as classrooms.

Ewha's pioneering and encouraging spirit of leadership has remained unchanged throughout century of rapid changes. Ewha's only rival today is the Ewha of yesterday.

In 1887, hospitals in Korea refused to admit or treat women due to outdated customs. Ewha opened Korea's first women's hospital, Pogoonyoogu, and provided proper, quality care for women with health problems. It also launched the first medical and nursing education program for women, producing the first female doctors and nurses in Korea. Treating patients with advanced medical care and producing medical professionals, the tradition of Pogoonyoogu was passed onto Ewha Medical Center and then Ewha Womans University Seoul Hospital, which opened in 2019 and continues to train outstanding doctors and medical scientists that will pioneer the future of medicine.

Embracing the World, Global Education

Ewha’s history of taking on challenges and breaking new ground began over 130 years ago. English grammar was taught in the early days of Ewha Haktang, and as early as in the 1920s, when old traditions opposed the education of women, Ewha taught classes in four languages, broadening the horizons of its students and fostering female leaders to actively engage with the world. Ewha’s efforts to embrace the world continues through active exchanges with 1,023 universities and institutions in 86 countries.

An Inextinguishable Passion for Learning

Ewha Haktang was founded by Mary F. Scantong in 1886 to offer educational opportunities for underprivileged women. It is Ewha’s enduring tradition to create a learning environment where students can explore and discover knowledge in an atmosphere of harmony and equality. The passion of the women who pursued their dreams at Ewha remains unchanged even today.

National exams for doctors, nurses, and pharmacists (2015, 2017)

• Top scorer in the national pharmacist exam (2015)
• Top scorer in the civil service exam (finance and economy), CPA (2016)
• First- and second-place scorers in the teacher certification exam
• Highest number of female executives in top 30 corporations
• Highest number of female ministers, female members in the National Assembly, female professors
Excellence
Ewha

Turning Women’s Potential into an Opportunity to Balance the World

Ewha’s English name, Ewha Womans University, embodies the school’s attitude toward students. The singular form ‘Womans’ is an expression of the university’s will and resolve to cherish each individual student and nurture their unique values. All of Ewha’s educational programs and research environments reflect its respect and love for students, the foundation on which women can realize their potential and bring balance to the world.

One Who Leads
T stands for telos, the Greek word for ‘purpose.’
Ewha aims to cultivate in students the capacity for intellectual exploration and creative convergence, thereby fostering them into world leaders.

- Capacity for Intellectual Investigation
  - Specialized knowledge, self-directed learning, critical and logical thinking

- Capacity for Creative Convergence
  - Consilience, creative solutions to challenges

One Who is Wise
H stands for hakma, the Hebrew word for ‘wisdom.’
Ewha aims to cultivate in students the capacity for art and culture and social empathy, thereby fostering them to relate to and be involved in addressing problems within their communities.

- Capacity for Valuing Art and Culture
  - Appreciation of art and aesthetic creation, cultural insight, and a spirit of harmony

- Capacity for Social Awareness
  - Communal values, communication and cooperation, social responsibility, sharing and solitude

One Who Acts
E stands for the English word ‘experience.’
Ewha aims to cultivate in students competence as global citizens who are equipped with social awareness and empathy and therefore able to communicate on an international level.

- Competence as World Citizens
  - Linguistic abilities, cultural tolerance, global perspectives
Customized Self-Designed Semesters
Ewha’s spirit of respecting individual personalities and autonomy in education is evident in its academic system. The concept of self-designed semesters was introduced in 2015 to allow students to plan and engage in activities towards achieving their dreams while earning credits along the way. Ewha fosters future talent with self-directed and creative intelligence by operating customized competency-based academic programs that realize students’ capabilities to the maximum extent.

Ensuring Academic Autonomy through Autonomous Evaluation
Ewha has introduced an efficient evaluation method that reflects the characteristics of each major and subjects in order to expand the autonomy of university education and to build a future education environment based on the idea of holistic education. The autonomous professor evaluation system allows professors to determine the grading method of undergraduate courses at their own discretion, according to the characteristics of each subject. This allows students to be graded by their individual accomplishments instead of competing against each other, thereby encouraging them to freely continue their intellectual exploration.

Respect and autonomy among students is central to Ewha’s educational philosophy to cultivate convergent leaders required by future societies. Ewha helps students to realize their full potential through cutting-edge infrastructure that creates an ideal environment for future education, and provides personalized career support.

Korea’s First Integrated Selection System among All Major Universities
Ewha was the first major university in Korea to introduce an integrated selection system for student applications, with the aim to foster creative and convergent students who are ready to take on the Fourth Industrial Revolution. Ewha selects students regardless of their chosen track in high school and provides optimized career planning so that students can choose their desired major after first experiencing various other majors.

Convergent Education to Develop a Broader Perspective and the Capacity for Self-initiative
Ewha fosters self-directed, creative, and convergent women by providing an interdisciplinary educational experience. Ewha has laid the foundation to cultivate leaders who are wise and active through customized major education via the 60 telos tracks. Ewha is also activating joint and multidisciplinary majors that will produce the human resources that modern society needs. Joint and multidisciplinary majors guarantee that students have autonomous choice and enable the university to foster creative talents equipped with broader perspectives.

Selected as a ‘Software-Centered University’, Fostering Female Talents for Convergent Software
As a pioneer in women’s education in science and engineering, Ewha was selected as the ‘2019 Software-Centered University’ by the Ministry of Science and ICT, securing financial support of 7 billion won over four years. A ‘Software-Centered University’ leads the expansion of the software values and competitiveness of Korea, as well as its industries and students through innovative software education that reflects contemporary industrial needs. As the need for human resources continues to increase with the advent of the Fourth Industrial Revolution, Ewha is pioneering the era of convergent female talents.
Shared and Open Future Class Environment

Ewha is leading the establishment of advanced infrastructure to create a shared and open future campus environment. Ewha possesses infrastructure such as Active Learning Classrooms (ALC), as well as high-tech and smart classrooms that establish a student-centered educational environment for classes that facilitate creative thinking through methods like flipped learning. In addition, Ewha is open to sharing its knowledge by providing K-MOOCs, Korean-style online lectures.

Integrated Future Design Management with THE Portfolio

Ewha supports students to manage their own academic information and future planning through the ‘THE Portfolio’, a customized integrated management system. The THE Portfolio is an online platform that supports customized academic activities and future career design by analyzing students’ information, including both educational and extracurricular activities. It acts as a navigation system directing Ewha students towards becoming professionals in every field.

Personalized Custom Employment/Start-Up Support

Ewha provides integrated career employment education to help students hone the practical skillsets needed in the field, with the global competencies required in this international era. Ewha actively supports students in their entry into society by providing effective employment and start-up opportunities, such as senior mentoring through our 330,000-strong alumnae network, as well as providing close support through personalized career planning.

Top Class Full-Cycle Scholarships

Ewha provides full-cycle scholarships to benefit all students, from undergraduate freshmen to master’s and doctoral students. Ewha supports students’ learning and dreams by generously providing 400 scholarships funded by internal and external sources and donations. These scholarships include not only general scholarships for students with financial difficulties or exceptional academic achievements, but also scholarships that reflect the values of Ewha as a way of motivating our students.

No. 1 On-Campus Housing in Seoul, Eco-Friendly Dormitory

Ewha houses a total of 4,300 students in its dormitories, including Hanwool House, I-House, Ottogi Global House, and E-House. In 2016, E-House was constructed with a capacity of 2,150. This increased Ewha’s total housing capacity by 22%, making it the highest among universities in Seoul. E-House, which won the Seoul Architecture Award, is known for its eco-friendly design and cutting-edge facilities. Its interior consists of units that offer private and public spaces. In this safe and convenient space, Ewha students learn to live and work in the spirit of cooperation, consideration, communication, and solidarity.
Among Korean universities, Ewha has numerous records of "firsts," including the first female medical doctor, the first female doctor of physics, as well as the world's first women's college of engineering. Based on world-renowned research capabilities and a global research network, Ewha is enhancing its status as a research-oriented university by producing world-class research results in various fields.

Driving Changes in Korean Medicine

Patient-Centered, Global Smart Hospital
Ewha Womans University Seoul Hospital

Tracing its roots to Pogoonyogon, Korea’s first medical institution for women, Ewha Womans University Medical Center opened its new hospital, Ewha Womans University Seoul Hospital, in the Mapo district of Seoul in 2019. Ewha Womans University Seoul Hospital has six basement levels and 10 above-ground floors with 1,014 beds, and for the first time in Korea, a three-bed ward as the standard, and single-bed rooms for all ICU units. It is a global smart hospital that combines cutting-edge IT technology with a smart medical care system. To gain a competitive edge in the field of severe illness and to strengthen its role as a university research hospital, the Advanced Medical Bioscience Research Institute is operating at Ewha Womans University Seoul Hospital and the Convergent Medical Research Institute at Ewha Womans University Mokdong Hospital. Ewha plans to create an international R&D hub and an advanced convergent healthcare cluster that will drive a paradigm shift in the healthcare industry.
We will continue our research to develop strategies for the prevention and treatment of serious diseases with the passionate and outstanding students of Ewha, who will become leaders in the future of medicine. As such, we will build Korea into a 21st century bio-medical industry powerhouse and contribute to improving human life.

My research aims to explore the human mind through an interdisciplinary approach that investigates the human brain at molecular, neural, and behavioral levels as to uncover novel ways to treat and prevent various disorders present in society. It is my greatest privilege to teach and train the nation’s top students as the next generation of world leaders in neuroscience, and take part in the contribution to knowledge.
Ewha, Becoming Greater within the World

Ewha is Harvard University’s only global partner in Korea, with exchange programs that have been on-going for over a decade including the Ewha-Harvard Summer School Program (EHSSP) since 2006 and the Ewha-Harvard College in Asia Program (HCAP) since 2007. These programs allow students of Ewha to interact with outstanding students from diverse backgrounds and nationalities to broaden their perspectives and give them the opportunity to experience global leadership. The close relationship between Ewha and Harvard also include the Harvard-Yenching Institute Visiting Scholars Program for faculty in the humanities and social sciences.

Harvard’s Only Partner University in Korea

Global leaders and dignitaries around the world visit Ewha when they come to Korea. Ewha has hosted distinguished guest such as Queen Elizabeth II of the United Kingdom (1999). Ewha has also hosted U.S. Secretary of State Hillary Rodham Clinton (2009) and Harvard’s first female president Dr. Drew Gilpin Faust (2013), who were appointed as Distinguished Honorary Ewha Fellows for their contributions to elevating the status of women. Other guests include Chilean President Michelle Bachelet (2009), German Chancellor Angela Dorothea Merkel (2010), and Estonian President Kersti Kaljulaid (2018), who received honorary doctoral degrees from Ewha.

Leading University Education Through Global Academic Exchanges

Ewha has worked tirelessly to establish itself as a leader in the future of college education through academic exchanges with major countries around the world. In 2019, Ewha participated in the US-Korea Conference on Science to showcase its excellence in science and engineering and to exchange ideas about current research trends. Ewha also attended the University Leadership Forum as a representative of Korean universities where it presented its vision for university education and the future of our technological society with the advent of the Fourth Industrial Revolution. Through continuous academic exchanges, Ewha advances the global contributions of women and remains at the forefront of producing knowledge and research.

World Female Leaders’ Eyes on Ewha

Ewha International Summer College (EISC)

This is the first summer school program in Korea, which began in 1971. It offers 1 month of high-quality lectures delivered by faculty and scholars of Ewha as well as other universities worldwide.

Ewha-Harvard Summer School Program (EHSSP)

This program offers the opportunity to study abroad and develop international perspectives. Credits and semesters earned at exchange universities are transferable.

Student Exchange Program

In this program, students plan and lead academic exchanges between the students of Ewha and Harvard.

Ewha-CUHK Global Student Partnership (GSP)

The GSP is a short term special exchange program that students plan and lead themselves. The Ewha-CUHK (Chinese University of Hong Kong) GSP began in 2019.

Ewha-Harvard College in Asia Program (EWHAA-HCAP)

Active since 2007, this program is building an international network of academic and cultural exchanges between the students of Ewha and Harvard.

PAGUS, ARS Semester Abroad Program

This program maximizes language learning efficiency by sending language students from the College of Liberal Arts at each destination.

Faculty-Led Study Abroad Program

In this program, students visit a major overseas university or institution with advising faculty, take part in lectures and seminars with experts, and reinforce their global competence.

Various International Programs

Ewha-CUHK Global Student Partnership (GSP)

In order to expand global educational opportunities for graduate students, the university has signed and is operating joint and double degree agreements with leading universities.

Benefiting the World With Ewha’s Values

The goal of education at Ewha is to create a peaceful society through female leaders who are mature, Christian women with professional academic knowledge and a spirit for volunteering. Ewha is reaching out to communities in Korea and abroad to spread the values of Ewha and contribute to communities in practical ways to create a network of people who can contribute to Korea as a nation and society as a whole.

**EWHA**

**Value**

**Reaching out Beyond Korea, to the World**

Volunteer work has always been part of Ewha’s history. With Ewha Volunteers at the center, students at Ewha conduct a wide range of activities. Students use their vacation time to participate in education, construction and medical work both in Korea and abroad, and experience the joy of becoming part of a growing community. Medical volunteers carry out community health projects and provide medical services, while educational volunteers carry out educational services for children and youth or cultural exchange activities in countries such as Vietnam and Cambodia.

**Ewha Volunteers**

- **Domestic Educational Volunteers**
  - Educational Volunteers for Children and Youth
  - Educational Volunteering and Cultural Exchange Activities for Children and Youth Overseas
- **Overseas Educational Volunteers**
  - Health Care and Medical Treatment for Underdeveloped Countries and Refugee Camps
- **Overseas Medical Volunteers**

**Worldwide Program for Women’s Education**

Ewha also offers a special global scholarship program that shares its educational capacity with women around the world. The Ewha Global Partnership Program (EGPP) is a global re-cultivation program that offers full scholarships to women in developing countries, helping them to become experts in their fields and global leaders of the 21st century. The Ewha-KOICA Master’s Program educates researchers and female officials in developing countries. Ewha strives to bring balance to the world as the center of global women’s education.

**EGPP (Ewha Global Partnership Program)**

- **Women of Developing Countries as Members of the Ewha Community**
- **EGPP Graduates**

**EWHA-KOICA Master’s Program**

- **Nurturing Global Gender Equality Leaders**
- **Ewha-KOICA Graduates**

**Training Experts in Korean Studies**

Ewha is known for its support of Korean Studies in South-east Asia and strives to lay the foundation for Korean Studies abroad. Ewha has cultivated high-level academics in Korean Studies for six years through the Official Development Assistance (ODA) project with the Royal Phnom Penh University of Cambodia. In Thailand, Ewha printed the first Korean Language textbooks for middle schools and supported the opening of Korean majors at the prestigious Chulalongkorn University.
Ewha is thankful for and proud of our network of 230,000 alumnae who are achieving firsts and bests worldwide in various fields of academia, research, law, government, management, media, culture, and art. Through 130 years of history, Ewha has been made even more special through our network of alumnae.

**Ewha Professional Club**

The Ewha Professional Club is a group of professional alumnae who are active in various fields, facilitating mutual communication and empathy. There are currently 12 professional clubs in operation, which practice the Ewha values of volunteering, dedication, service, and sharing through donating and mentoring.

**Ewha Management Forum**

A group of CEOs, executives, one-person company representatives, and startup representatives

Beyond Comparison across the World

Unique Ewha

Ewha’s Colleges and Graduate Schools, Fostering Creative Female Intellectuals

Ewha has grown into a truly global women’s university and is proud to be a place that is Beyond Comparison across the World. Ewha’s pride is made all the more resolute by its colleges and graduate schools that reflect its spirit and passion. Here we introduce the colleges and graduate schools that continue to train convergent leaders of the Fourth Industrial Revolution.

Ewha’s Colleges and Graduate Schools, Fostering Creative Female Intellectuals

Ewha has grown into a truly global women’s university and is proud to be a place that is Beyond Comparison across the World. Ewha’s pride is made all the more resolute by its colleges and graduate schools that reflect its spirit and passion. Here we introduce the colleges and graduate schools that continue to train convergent leaders of the Fourth Industrial Revolution.

Nurturing Global Talent to Create New Cultures

The humanities comprise a discipline that explores the human way of life based on reflections of human nature. It is the foundation for all academic pursuits and character-building. Since its foundation in 1925 as the Humanities Division, the college has grown alongside Ewha’s history and tradition, establishing sound values and historical awareness through in-depth research in various languages. As such, the College of Liberal Arts now trains humanities scholars to equip them with the comprehensive knowledge to create new cultures. Our interdisciplinary approach means the college is extraordinarily well equipped to produce the future leaders of a global society.

Educating Pragmatic Leaders of Our Times

Social sciences are based on a structured understanding of the establishment and development of social environments forming a discipline that asks practical questions and seeks concrete solutions. Founded in 1996, the College of Social Sciences is dedicated to carrying forward Ewha’s pioneering spirit and cultivating the leaders of tomorrow. With the aim of contributing to the progress of humanity, the college’s outstanding faculty combines theory and practice to offer a wide range of curricula and support programs, in addition to exchange programs with prestigious universities abroad, ultimately nurturing global leaders.
A Cradle for Korea’s Female Scientist Leaders

The College of Natural Sciences, which grew from the natural science departments founded in 1951, has served as the backbone of education and research in basic and applied sciences at Ewha. The college was founded in 1982 and later launched additional majors to meet the demands of fast-changing industries. Today the college is equipped with state-of-the-art labs and computer facilities to support the innovative research conducted at Ewha’s many research centers and to train outstanding female scientists.

World’s First Women’s College of Engineering, Leading the Era of Women in Engineering

Ewha’s College of Engineering was founded in 1996 with the mission to foster the world’s most outstanding female engineers. ELTEC is an acronym for the five core capabilities that it seeks to accomplish: Excellence, Leadership, Technology, Entrepreneurship, and Convergence. ELTEC, in pursuit of the educational goal of “fostering global female engineering leaders of creative convergence,” operates specialized university-industry cooperation curricula that reflect industry demands. It ensures competitiveness as a foundation for cultivating future-minded talent through practical training.

A World-class Institution for Musical Education

The Music Department at Ewha was established in April 1925 at the same time as Ewha College. It was the first institution in Korea for professional music education and played a central role in the field of Korean music. The College of Music is equipped with facilities for education, practice, and research, along with a curriculum that combines both practice and theory in order to foster professional musicians that can adapt to a changing society and grow into world-renowned musicians and teachers.
Fostering Global Teachers and Education Experts to Spearhead the Development of Future Education

Founded upon Christian pedagogy, Ewha’s College of Education is Korea’s only teacher training institution to offer a full range of programs encompassing kindergarten, elementary school, middle school, and special education. The college fosters educational experts and leaders who combine theory and practice in various fields of society as well as in the field of education through organic cooperation and networks with affiliated schools and research institutes. It continues to pursue excellence in education with the aim of sharing the benefits of education and to continually push for future changes, while securing its position as a training ground for teachers with a global perspective.

Ewha Business Administration, Birthplace of Global Leaders in Business Evolution

The College of Business Administration, consisting solely of the Division of Business Administration, offers unparalleled education in order to develop female professionals with a deep understanding of management in general and creative problem-solving skills. It also offers a wide range of university-industry programs that help students to gain understanding and experience of the field. In particular, the college fosters talented individuals with global competitiveness through targeted English lectures and offers the largest number of international exchange programs. It has also introduced a variety of career support systems, including advisory faculty, internship programs, and classes for certified public accountants to provide customized education that best reflects the needs of students and society.

Fostering Convergence Talent to Lead the Women-friendly Industries of the Future

The College of Science and Industry Convergence was established in 2016 with the aim of cultivating leaders with creativity, convergence, and global capabilities in preparation for the era of the Fourth Industrial Revolution. The college consists of six women-friendly and future-oriented departments that integrate the humanities, social and natural sciences, design and engineering, subsequently discovering new pioneering values in the process. Students are encouraged to develop interdisciplinary creativity for theory and practice, the common and specific, as well as the local and the global.

Educat ing 21st-century Women Leaders in Health and Medicine

Since its establishment in 1945, Ewha’s College of Medicine has cultivated many outstanding female physicians and medical researchers. It was relocated in 2019 to a campus with cutting-edge education and research systems in preparation for another leap forward. The college aims to cultivate outstanding female medical professionals through medical curricula that integrate basic and clinical medicine, future medical research, domestic and international volunteering, and participation in healthcare activities.
**College of Nursing**

Training Professional Nurses with Global Capabilities

In 1903, Ewha heralded the launch of nursing education for the first time in Korea. Since then, the College of Nursing has been featuring a new model of nursing education with a challenging and innovative spirit, as well as training medical professionals in Korea and overseas with global leadership and scientific nursing skills. Graduates excel as nursing leaders in domestic and foreign nursing practice, education, and research. It also boasts excellent faculty members and cutting-edge simulation centers, leading the development of future nursing education as a hub for global nursing education.

**Scranton College**

Educatng Global Professionals Equipped with Convergent Knowledge and Creative Mindsets

The Scranton College was founded in 2007 with the vision of educating global professionals equipped with interdisciplinary knowledge and creative mindsets to lead the way in the knowledge- and information-based society of the 21st century. The majors offered create a synergistic environment that leads Ewha's push for academic excellence and globalization. A variety of tutoring and mentoring programs are offered to develop each individual student’s potential and encourage communication, not only between faculty and students but also students themselves.

**College of Pharmacy**

Fostering Global Convergent Talents in Pharmacy to Lead the Future

The College of Pharmacy started as Ewha College's Pharmacy Department, which was established in 1945 as part of the Haengnimwon division. Graduates of the college now play central roles in a wide range of settings including hospitals, pharmacies, pharmaceutical companies and administrative organizations. Today the college has firmly established itself as a core institution of pharmaceutical education in Korea, actively carrying out government-funded research projects, including BK21 Plus, pharmaceutical industry specialized projects, leading research center support projects, and the AI drug development platform establishment project. With its outstanding faculty and state-of-the-art research facilities, supported by one of the highest average research grants per person, the College of Pharmacy is fostering convergent global pharmacists who will lead the field into the future.

**HOKMA College of General Education**

Cultivating 'Wise' Leaders with Harmony and Balance

The HOKMA College of General Education, an institution established in 2015 for future-oriented liberal arts education, provides educational opportunities in various forms and methods in order to cultivate global creative, practical, and empathic talents. Students here acquire five core competencies, enrolling in required or elective courses in the five liberal art areas offered by the HOKMA College of General Education. Since 2018, students admitted via regular admissions are instructed by the HOKMA College of General Education before they decide on their major from the seven colleges. This initial period provides students with a variety of courses and programs designed to explore the integrated and organic wealth of knowledge and competencies that can be linked to each major within the overall education system.
Ewha Womans University

Established in 1950, Ewha established Korea’s first women’s graduate school in 1950, producing outstanding female leaders to represent our society. Ewha has since developed into a world-class research-centered university in order to evolve into a pioneering female intellectual community, and aims to improve its research results by securing world-class professors, expanding research support personnel, and actively supporting research institutes. The graduate school is not only teaching knowledge, but is also striving to cultivate the capability to solve emerging problems in this rapidly-changing world.

Professional Graduate Schools

Cradle for Global Leaders Equipped with Professionalism

Ewha operates four professional graduate schools to equip talented women with international awareness and high levels of expertise and leadership. The Graduate School of International Studies is developing leaders for this era of globalization and information. The Graduate School of Translation & Interpretation trains and produces professional interpreters and translators who can play an active role on the international stage. The Graduate School of Business fosters female leaders of global economic growth through differentiated management education. The School of Law is dedicated to nurturing legal professionals and next-generation female leaders with outstanding professional skills and ethics based on the best research faculty and specialized training facilities.
