

Student guide on taking Hybrid Modeled courses (Fall semester 2020)

Basic Principle

As a response to the current circumstance of social distancing Level 1 stage, Ewha will be running multiple models of courses in the fall semester 2020.

Theory, Theory&Practice Courses	Courses with 50 or more registered students ⇒ ONLINE Courses with less than 50 registered students ⇒ HYBRID
Practice Courses	HYBRID MODEL (Offline class can be scheduled according to the course characteristics. For further details refer to the syllabus)

What is Hybrid Modeled course?

- Professors give lectures in the assigned classroom, while online class is provided (simultaneous live streaming of the on-site lectures or post-class upload of recorded video/audio file, etc.).
- Students choose their choice of class model either to attend (and participate) online or offline. Refer to the following page for further details.
- Your choice of either taking the class online or offline will not affect your attendance or grades.

How are “less than 50 registered students” in theory, theory & practice courses decided?

1	It will be decided by the number of students registered in the course, during the course registration period* in the Summer vacation. *Undergraduate: 17:00 Fri, August 14, Graduate: 17:00 Thurs, August 20
2	Even if the number of registered students change during the course add and drop period, class model will not be affected by the changed number . Ex 1) If 49 students registered initially, then it <i>is decided as Hybrid model</i> ⇒ 55 students registered during the course add and drop period, <i>it stays as Hybrid model</i> . Ex 2) If 55 students registered initially, then it <i>is decided as online class</i> ⇒ 49 students registered during the course add and drop period, <i>it stays online class</i> .

Can the class model of Theory, Theory&Practice courses be changed?

Hybrid modeled courses are conducted offline *and* online. However, for the purpose of effective teaching and learning to which professor and students *both* come to an agreement, the class model can be changed *after consensus is reached and approved by the Dean of the College*.

※ In the case of changing to offline class, it can only be done within the capacity of classrooms.

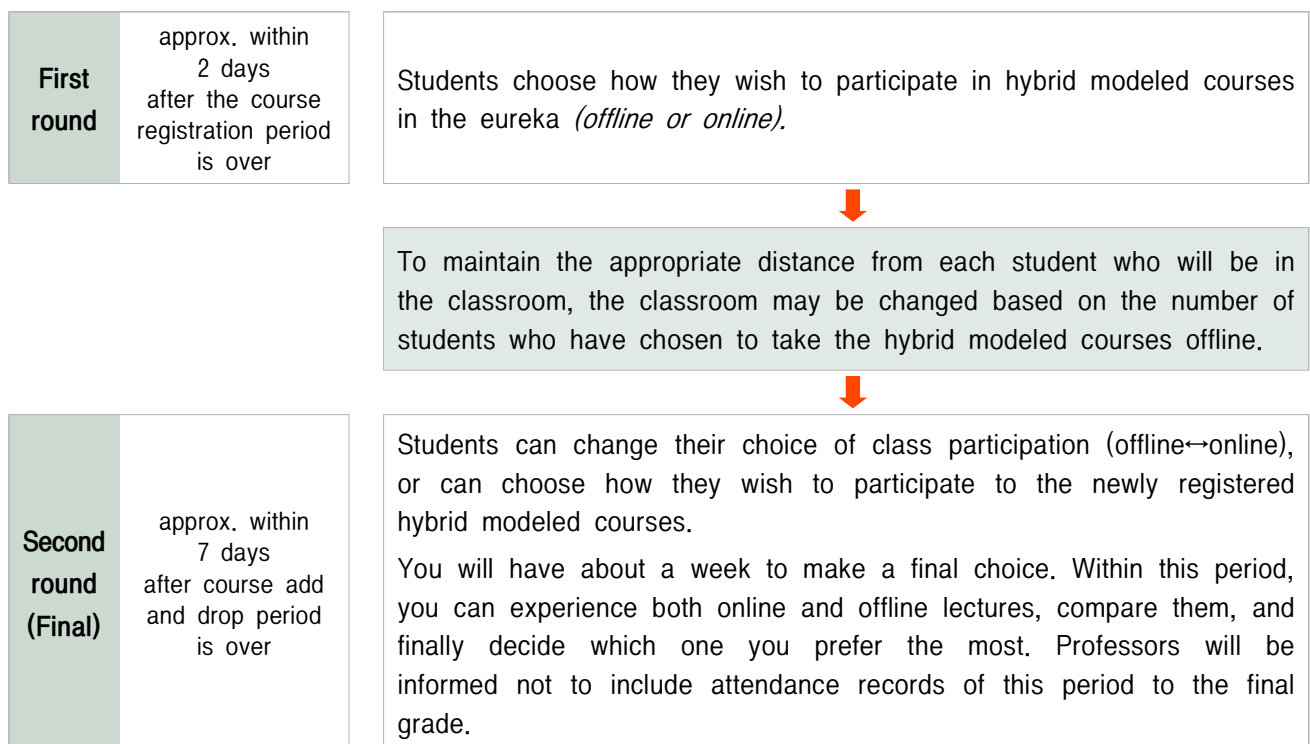

Ex) List of possible class models:

Offline only or online only for all students (whole semester) /

Alternative day-to-day, by-weekly or by-half semester / Taught by groups, etc.

How to choose the class model(offline/online) of Hybrid modeled courses?

Students can choose how they wish to participate in hybrid modeled courses via MyEureka. We will be opening the menu after the course registration is completed.

Important information

- After the Second (final) round, you cannot change your choice. Temporary switch (one time) may be possible only in the case of unavoidable circumstances (such as medical issues), when the professor approves.
- Classrooms may be changed based on the number of students who have chosen to take the course offline during the first round in the vacation. Therefore, the number of students who can change to offline during the second round *can be restricted on first come first served*. It is due to the limited number of classroom capacities and to protect everyone's safety and disinfection.

**Given information may change depending on the domestic circumstances of COVID-19 in the future.*
